**Subject:** Microsoft Settlement (aka hang-em)

I have read the proposed settlement and find it delusional/insulting.  
Why should Microsoft be rewarded for business practices that were found illegal, and why should Microsoft be allow to retain the fruits of illegal actions.

Additionally Microsoft's conduct during the trial if committed by a common citizen would land that citizen in jail (tampering with evidence, faking evidence, Microsoft's counsel lying/misleading a federal judge).

So yes, you should consider this a vote against the current settlement.
